SUNRISE, FL. — ProNet Group, a leader in forensic consulting services to the insurance, corporate risk management and legal industries for the past twenty (20) years, announces the addition of Brian R. Horner, P.E., to the structural engineering team covering the Florida Gold Coast region.

“ProNet Group is happy to have Brian Horner join our firm,” said Jane Heintz, President. “A large percentage of our clients’ structural engineering needs in south Florida are roof damage claims, and Brian has extensive experience inspecting and evaluating all types of roofing systems – both commercial and residential. Brian’s background, education, and professional experience also match very well with more complex commercial loss and construction defect claims.”

Mr. Horner is a registered Professional Engineer in Florida with twelve (12) years of practiced experience. The past five (5) years he has worked as an engineering consultant for the commercial real estate market in south Florida providing engineering and environmental assessments for retail shopping centers, high-rise office buildings, and large multi-family residential properties. He has a variety of experience in construction material types and systems, and understanding and interpreting building codes. He has held positions from Design Engineer to Vice President of Engineering with previous firms.

Following is a partial list of Mr. Horner’s areas of expertise:

- Construction Defects/Failure Analysis
- Foundation Repair System Designs
- Storm Damage Evaluations
- Provide engineering solutions for damaged structures due to fire, wind, flood and vehicle impact
- Roof Damage Evaluations
- 40 Year Recertification Inspections in Miami-Dade and Broward Counties
- Structural evaluation and design for commercial properties

ProNet Group, founded in 1990, is headquartered in Houston, Texas (Sugar Land) with offices in Ft. Lauderdale (Sunrise), Orlando, Tampa, Dallas, and New Orleans.

ProNet specializes in investigation and research on issues involving but not limited to; Structural failures/damages, Water intrusion origin and cause, Fire/Explosion origin and cause, Accident reconstruction, Vehicular failures/damages, Product liability, Industrial accidents, Catastrophic events, Contractor defaults, Electrical engineering investigations and Surety consulting.
