HOUSTON, TX. — ProNet Group, a leader in forensic consulting services to the insurance, corporate risk management and legal industries for the past twenty (20) years, announces the addition of Jason Watson, P.E., to the structural engineering team in Texas.

“ProNet Group is delighted to have Jason join our Houston operation,” said Jane Heintz, President. “He has extensive experience in structural engineering design and failure analysis of residential, commercial and industrial buildings and structures – from foundations to roof decking. Our clients tend to have their greatest need for professional engineers that have expertise in these areas.”

Mr. Watson is a registered Professional Engineer in Texas, Colorado, and Utah. His expertise includes structural engineering design, failure analysis, and inspections. He has a variety of experience in construction material types and systems, and understanding and interpreting construction plans, building codes, and industry standards. He has held positions from Design Engineer to Vice President of Engineering Services with previous firms.

Following is a partial list of Mr. Watson’s areas of expertise:

- Construction Defects/Failure Analysis
- Foundation Design Calculations
- Storm Damage Evaluations
- Foundation Settlement and Failure Analysis
- Roof Damage Evaluations
- New Construction/Structural Repair Design
- Structural Roofing Analysis

“ProNet has earned a solid reputation with our clients and the industry as a whole for providing exemplary forensic engineering and professional consulting services,” Heintz said. “The addition of Jason is another step in our commitment to meeting the needs and surpassing the expectations of our clients in Houston and throughout Texas and surrounding states.”

ProNet Group, founded in 1990, is headquartered in Houston, Texas (Sugar Land) with offices in Dallas, New Orleans, Orlando, Tampa, and Ft. Lauderdale.

ProNet specializes in investigation and research on issues involving but not limited to; Structural failures/damages, Water intrusion origin and cause, Fire/Explosion origin and cause, Accident reconstruction, Vehicular failures/damages, Product liability, Industrial accidents, Catastrophic events, Contractor defaults, Electrical engineering investigations and Surety consulting.
