

At **ProNet** we provide **answers**

VEHICLE FORENSICS

- Fire Origin & Cause
- Collision Damage & Consistency Analysis
- ADAS (Advanced Driver Assistance Systems) Analysis

- Fuel System Contamination
- Post Theft & Vandalism Evaluations
- Mechanical System Failure

- Location of Impact
- Contributing Factors
- Vehicle Data & Systems

- In-Vehicle Infotainment Forensics / Telematics
- Crash Data Retrieval
- Expert Witness

Vehicle sensors continuously relay information to electronic modules for the purpose of controlling and operating the vehicle. ProNet experts use the vehicle as a key witness to testify regarding the data facts such as speed, braking and cruise control information, phone usage, seatbelt status, and more.

Our vehicle expert team consists of individuals that are ACTAR certified Mechanical Engineers, Certified Master Technicians, Certified Fire & Explosion Investigators and Certified Vehicle Fire Investigators. Team members are court-qualified in accident reconstruction, collision and damage analysis, and mechanical failure.
